

Vitibot present at the agriculture show 2022 #SIA2022

Reims, February 15 2022 – VitiBot, world leader in the wine-growing robotics market with its Bakus® solution, a 100% electric and autonomous robot, will be at the Paris Expo (Porte de Versailles) from February 26 to March 6, 2022, at the “Ferme Digitale” stand.

2022, year of the reunion at the SIA and 1st presentation of Bakus® to the general public

VitiBot answers the call of “La ferme digitale” in association with RobAgri to participate in this edition of the International Agricultural Show.

It’s the occasion for the company to present for the first time to the general public the most commercialized vineyard robot in the world: Bakus®.

This new companion of the winegrower is a beautiful concentrate of technology, robust and precise, capable of responding to the current challenges of viticulture in terms of sustainable development. Its use of a disconcerting ease frees the user from the tiring tasks on his vineyard. Bakus® thus offers the world of viticulture a solution that reconciles economy and ecology in optimal safety conditions.

It offers a number of innovative tools, all 100% electric (awarded at SIMA, SITEVI and VINITECH for example), making it possible to provide real operational means for soil cultivation and phytosanitary treatments that will meet the most stringent agro-environmental requirements.

Bakus® is the result of 5 years of research and development by a team of young engineers, all passionate about robotics and ecology, who have put at the heart of their project the ambition to offer new and much more virtuous viticultural practices for the benefit of winegrowers and the population.

About VitiBot

VitiBot is today a young company that embodies in its field the new dynamics of the French industry at the origin of new professions and numerous jobs to come. Its young founder, Cédric Bache, is at the helm of the company and has no shortage of ambition to lead it to a future leadership position in agricultural equipment.

After two successful fundraising that saw prestigious investors join the adventure, this year the company is committed to a new round of financing, which will ensure its ambitious industrial and commercial development project, including accelerated access to international markets.

Hall 4, stand A 129
